On the Wings Of Pegasus.

By MARTHA COBB SANFORD.

Copyright, 1907, by M. M. Cunningham.

"A foine day f'r a canter, miss. commented genial Mike as Marcia one hand on his shoulder, the other on the pommel, sprang lightly into the saddle.

"Heavenly!" agreed the girl, but the wistful expression in her eyes belied her gayety.

"Wud ye be goin' alone?" queried Mike, skillfully adjusting the folds of ber riding skirt.

"It looks that way." laughed Marcia "unless I meet Lochinvar on the high

"I was only thinkin', Pegasus is pret ty fr-risky the day, owin' to shtandir, so long in the shtall. He's loikely to run wid ye, Miss Marcia. But av coorse if Misther Lock-pardon, miss I f'git the rist av 'is name-is goin' to meet ye"-

Marcia interrupted him with a merry laugh.

"Oh, Pegasus and I will get along all right. How his coat shines! No one ever took such good care of him as you do. Mike. He'd win the blue ribbon at any horse show."

Mike grinned appreciatively and tip ped his can

"Now don't ye be doin' any jumpin' Miss Marcia," he cautioned, as Marcia, her proud chin held high, gave Pegasus a smart flick with her silver tipped crop and trotted off along the smoothly raked drive.

"Phwat r-rud wud ye be takin', Miss Marcia?" called the admiring groom after her.

The Tanglewood road, I guess, Marcia answered back over her shoulder.

There really was no guesswork about it. Since a certain memorable day nearly a month ago no other road had beld for Marcia any charm-and yet for three long weeks she had persist ently taken another direction.

Now, as she turned toward the highway that led into the old winding road, her thoughts galloped ahead of her horse's hoofs, and already in imagination she had brought Pegasus to a halt at the edge of the wood and was watching, spellbound, a man and horse take jump after jump over the meadow wall.

How she longed to try it herself! Pegasus vaulted beautifully, she knew. She had seen him take the bars many a time when out at pleasure. But she had promised her father that she would never attempt it. That was the condition, in fact, by which Pegasus was her very own possession.

Then she remembered with a thrill how Pegasus had suddenly started and before she could control him had followed the lead of the other rider and bounded with the grace of a greyhound over the meadow wall. The unexpectedness of it had quite taken her breath away. But, oh, was there ever any sensation so exquisite?

Before she could recover from her surprise the unknown rider had galloped up beside her and, dispensing with even an apology for his lack of conventionality, exclaimed: "A magnificent performance! Please accept my compliments."

And she, conscious of the rising color in her cheeks, had answered smil-"The praise belongs all to Pegasus

I didn't know he was going to do it." How incredulous the man had looked! "You mean?" he asked, doubting his

"That I never took a jump before. My horse followed your lead. I was never more astonished in all my life." "In that case allow me to pay my compliments over again," the man had

then said, looking at her with undisguised admiration. "Pegasus has a wonderfully clever rider."

And then-Marcia blushed to recall it-she had spent the rest of that glorious morning in taking vaulting lessons from an unknown riding master. And if further truth be told she had let the accident of one day dictate the programme of the next. But after that discretion had come to the rescue, and romance was forced to beat a reluctant but absolute retreat. In other words. every day for three long monotonous weeks Marcia had resolutely avoided the vicinity of Tanglewood road.

But today she had closed her ears to the prosaic arguments of prudence and literally given rein to her fancy. The air was as crisp and the sky as blue as on that other day. Her heart thumped with excitement

"Faster, Pegasus, faster," she urged, touching the horse's shining flanks with her crop. "We're almost there." When the edge of the wood was

reached she drew rein and with eager, shining eyes looked out expectantly over the brown meadows. There was no one in sight. Well, she would have one jump anyway.

Pegasus was as keen for the sport as Mareia herself. He took the wall handsomely not only once, but again Then, a gate of bars farand again. ther down in the wall catching Marcia's attention, she decided to put her borse at that. It was higher than the wall and would be glorious to fly over

Just as Pegasus sprang for the leap the sound of hoofs galloping hard behind her caused Marcia to look back. She recognized Mike on her father's saddle horse, and the next moment, bow she never knew, found herself hurled high over Pegasus' head.

As luck would have it, she landed on a heap of dead leaves blown by the my son, it's alimony.-Puck

winds against the flank of the wall; and so was only badly stunned. When at length she recovered consciousness some one was kneeling beside her and bathing her forehead with cold water. "Don't tell father, Mike," she pleaded faintly, her eyes still closed.

"No. miss." Then again after a few minutes silence:

"Am I badly hurt, Mike?" "Not the ghost of a scratch, Miss Marcia. I couldn't have picked out a betther place fir ye to land myself-a pile av soft leaves and a shtrame of water-r close by. Faith an' it's luck was ridin' wid ye the day, Miss Mar-

And then, while her head rested on his shoulder, the unknown knight explained to his lady of the saddle how he came to be Mike and Lochinvar and Kendall Lee, Esq., architect by profession, all rolled into one. I partly her fault of course, for she had dismissed him heartlessly from her service, and he had had to get back into it by hook or by crook.

The Peasant Water Doctor

At Volbeck, a little place near Munster, Germany, one of the notable tigures has been for several years the water doctor, a peasant named Josef Garthaus. His "practice' is so great. says a Frankfurt paper, that he will see patients on three days in the week only. The "doctor" was recently summoned before the tax officers, to whom he had never made a statement as to his income. Even before that body he would make no statement and paid the tax on the authorities' estimate of 14,000 marks income a year. And this man," says the report, "practices at the very gates of Munster, where there are sixty physicians in good standing and where a medical faculty is being organized. The surprise becomes greater when it is known that the 'doctor' never charges more than 50 pfennigs for a consultation. How many thousands of people must seek his help? At the low estimate of the tax board Garthaus must be consulted **by** 28,000 a year."

An Arabian Barber.

The usual Arab instrument for shave ing, declares Mr. M. W. Hilton-Simp son, the author of "Algiers and Beyond," is the ordinary sheath knife, on which the Arab gets a very fine edge. He adds that when in camp in the Haouamed country he has seen a man kill and skin a sheep and be call the next morning. I-stood there shaved with the same knife in less than half an hour.

"The barbers in the market place at Biskra are certainly a most rough and ready lot, and the sight of one of them shaving a head is not easily forgotten One day I saw a camel driver going to one of them with a head of hair quite as long and thick as an ordinary well groomed Englishman's. He took a seat upon a rickety chair, and the barber, having moistened the thir with wa ter, proceeded to shave him as bald as a coot with an old European razor without making the very slightest cut upon his skin. No soap was used, and the operation took only about three

This big bridge, which carries the highway of Connecticut avenue across Rock creek, is one of the grandest concrete structures in the country. Work on it was commenced in 1898, and since then the construction has been carried on by yearly appropriations. The total cost is \$850,000.

Dimensions of the Bridge.

The bridge is described as fifty-two feet wille over all, and the maximum A faint color stole into the girl's other by twenty foot plers, and at each enti of this series of arches there "But I can jump, Mike. You should is an arch of eighty-two feet. The smaller arches are separated from the others by an abutment having a width of thirty-seven feet. At the ends of the bridge proper there are two abutments about 136 feet in length.

The bridge is said to be the targest structure of the sort that has ever been built of concrete. In fact, it may be said to be the pioneer in the use of such material for a structure of its magnitude. Its construction was started nearly ten years ago, when concrete had not the prominent place it has attained in the last half dozen years.

The bride is finished with a concrete parapet and metal railing of the following description: Over the piers there is a solid parapet, and between the piers every seventeen feet there are concrete posts, each coming directly over the spandrel walls. Between these concrete posts is an iron railing consisting of vertical square ballusters and The lamps are possibly the most ornamental "fixings" on the bridge aside from the lions. They are made of cast tive design. There are two sidewalks He paused and waited for Marcia to on the bridge, each eight feet wide, speak, but never a word said Marcia, and there is a roadway of thirty-six feet. The roadway is temporary and is made of macadam. A permanent roadwas will not be laid until the entire fill has had ample opportunity to settle. When it has settled cement and asphalt will be used.

Liked the Old Pens.

Some years ago a member of con gress from Ohio took a fancy to the pens used by the members. When he refired to private life he had accumulated a supply of pens which would last him the rest of his natural life, "But it takes only one little word to be thought. Finally two boxes of the dd pens were found, which Mr. Keife immediately sent to the aged Ohiom, with a feeling, as he said, "of a dity well performed."

President Lincoln's Last Writing.

Ex-Schator Stewart of Nevada pass ed the main portico of the White House the other day on his way to the executive offices to see the president.

Pointing to the historic steps of the White House, he said: "I saw President Lincoln get into his carriage from those sleps the night he was tilled I was the last man to speak to him at the White House. He wrote me a note that night that I would give \$1, 000 if had now. It was this way: Mr. Lincoln's calling hour for congressional risitors was 7 o'clock in the evening I was in the senate and called at the White House about 7:30 that evening. The presidential offices vere then located in the second story. From there I sent my card to the president, who winte upon it these words: 'I have an enginement to take Mrs. Lincola to the theater, an engagement I never break, Call tomorrow morning at 10 o'clock. That, I believe, was the last The Mr Lincoln ever wrote on my way out of the White House I met President Lincoln in the lobby, going to his carriage with his wife He stopped to shake hands and rejerted to me that he would like to have me until he helped Mrs. Lincoln h the carriage and got in himself," The New House Offices.

In the new house office building each

member of the house will loccity a room B by 20 feet, with large vindows at the end. The walls are finished in a buff tinted plaster and the ceiling in white. On a day last summer when Elliott Woods, superitendent of the capitol, was consilering where he should find the materal for a plaster for these rooms, one if his men suggested that he take a dedge, go down the river fifty miles and get a peculiar sand that when mad into plaster would turn to a beautifu buff. Mr. Woods gave him permission and the walls are the result.

The furniture is of solid mah gany. Each member is provided with a arge roll tork desk for his own use, a maller rollstop desk for his secretary, a large heavy center table, a confortable Turkish chair, two desk chair and four reception chairs. CARL SCHOFIELD.

CHINESE TIDLITS.

The Way Vegetables and Meats Are Preserved by the Mativet.

In China turnips, several varieties of

cabbage and seaweed are often pacuared for winter by giving them a cont of salt and drying in the sun. A veg a ble resembling cabbage is some lifties dried in the sun without salt and put away in shallow baskets until ready for use. They have a way also of making a kind of sauerkraut very much as Americans do. The treatment of certain vegetables in this way is a common practice. The best native hams come from a region known as the Kinhua district, in Chekiang province. The hams when dressed and ready for curing are carefully placed in vats. A kind of pickle is then prepared of salt, water and a sauce from the soy bean. which is poured over the fresh hams. After the hams have been in the pickle a sufficient length of time they are taken out and hung up to dry and occasionally, but not often, smoked, when they are ready for the market. Some times a little nitrate of potash is also added to help preserve them, but this addition is the exception and not the rule. It is reported that in the south hams are cured by means of an alkaline earth and common salt, but so far as can be learned no earth of any kind is employed in the middle and porthern provinces. The famous pickled eggs of China are preserved with a pickle made of common mud, salt, saltpeter and soy bean sauce, all mixed together. The eggs are coated with a plaster of this mixture and laid away until ripe. when they are ready for the table. Prepared in this way they will keep several months.

PAPER MAKING IN KOREA.

Hermit Kingdom Supplies Best to China and Japan.

It is not generally known that the best kinds of paper met with in China and Japan are the product of Korea It is claimed by many that the Korean paper excels the very best that is made in China and Japan. It is produced entirely by manual labor and without the use of any machinery. The raw material used for the better kinds is obtained from the bark of the Prouse sonetia papyrifera, which is collected in the spring and beaten in water containing a large admixture of wood ashes until reduced to a thick pulp.

This is taken in large ladles and spread upon frames of bamboo so as to form thin sheets. Another kind of paper is made from old scraps trodden into pulp, much in the same way that grape juice is extracted in some countries, and, though this mode of pulping is slow, it has the advantage of not breaking the fiber so much as when machinery is used.

After the pulp has been made into paper the sheets are piled up to a height of six feet and then cut into Boston Elevated Railway Co. pieces, to be again subjected to the stamping with the feet. At the same time the roots and seeds of a plant called tackpoul are added, the soluble parts of which are supposed to give tenacity and toughness to the paper .-Exchange.

A devout worshiper in the rear of the church jumped to his feet and snapped his fingers excitedly.

Whuffo does yer, my brudder, r'ar up an' snap yo' fingers when I speaks uv melon stealin'?" asked the preach

"Kaze yo' les' minds me whar I lef" mah overcoat," replied the devout worshiper as he hurried off.

A Poor Prophet.

Conan Doyle told of an experience which he had when leaving school. His teacher must have been one of those noble old Romans such as Thack eray describes as roaring at young Pendennis when the major, his uncle, called to take the boy away. When Conan Doyle had finished his course in school the head master called him aside and, after eving him with ominous disfavor, spoke to him in measured tones as follows: "Dovle, I have known you now for seven years, and I know you thoroughly. I am going to say something which you will remember in after life. Doyle, you will never come to any good!"-Bookman.

Like Unto Caesar.

By J. LUDLUM LEE. \$

Copyright, 1907, by N. E. Daley.

The giant steamship tossed and pitched. The decks were wet with spray from the angry waves, and you could count the passengers on deck on one hand. Two hasky men lurched against each other as they turned the corner, both muffled to their ears, put ing vigorously at their pipes to produce a welcome speck of warrith.

"Beg pardon-didn't see you in this rotten fog," said the younger of the

"Rotten don't describe it, sir. It'swell, I'll be banged! My pipe went out in that collision, I guess. Got a match?"

"Sure I have! But what good is it out here? A torch wouldn't stay light ed in this wind. Come inside a minute and light her up."

They were back on deck in a moment and, as so often happens on board ship, in that time seemed to have made friends. Arm in arm this time they braved the wind and weath er. The older man was talking

I suppose you think a man of my age ought to be in his cabin a night like this: But, you see, my wife is sick in one bunk and my daughter down and out in another. Guess you and I are about the only ones to ven ture out, aren't we?"

"Guess we are, sir, unless of course, the girl with the sable coat is on deck Nothing keeps her below.

"Girl in sable coat. Who's she?" demanded the elderly man, his attention somewhat aroused

"Well, I don't know. She is the usual mystery found aboard a boat of this character. Captain says she's a titled woman from the continent going over to see the States. Whoever she is, she's a stunner, old man. Here she is now," he whispered as the figure of a woman passed them.

The old gentleman turned, but too late to see anything save the outline of a woman, clad in a long sable coat. which enveloped her from head to heels.

"Looks pretty good in the dark young man. I'll take a better peek in the daylight, and in the meantime I guess I'll go below and look after mysick. Good night, sir.'

"Good night." said the younger man as he left his newly made friend at the companionway

Eaton Hollis, representing an English syndicate and bound for New York, was not ready to turn in. He had no one below to look after and fell into a long, steady stride around the deck. He puffed at his pipe and wondered what the girl in the sable coat was doing. He didn't want to appear officious, but he could not help won dering, and as he walked he kept his eyes well open for the fur clad figure He did not have to look long, for she passed him very soon. Try as he would be could find no plausible excuse for speaking to this evidently self reliant young woman of title, so on he strode

Just amidship he heard a voice such a voice that today he can shut his eyes and hear it in his dreams-saying

Oh, I beg your pardon, but would you help me to open this door? I sim ply cannot do it."

He sprang to her side in an instant. but the door did not yield so easily.

"Do you want to go in? You know the moon is just coming up, and I think the storm is all over." Hollis had grown bold of a sudden. "Well, really, I do not, want to go

in, but you know my maid is dreadful ly ill, and it seems cruel to leave her alone," answered the sweet voice. "Oh. bother the maid! Take my

arm and let's see how it goes driving double-you can fight the wind so much better with two abreast," urged Hollis, as he extended his left arm She looked up at the strong features

and then at the glimmer of the moon breaking through the clouds. hesitated for just a moment, then without a word took the proffered arm, and off they went.

The next morning broke clear and

bright, and the girl in sable had chang ed her raiment to a suit which bespoke the art of England's best tailor. That night her gown was of soft, clinging material which showed her figure to perfection, while the cloak that covered her shoulders was the envy of the women passengers. With every gown were bits of jewelry that seemed to belong to them and to just suit her who wore the gorgeous raiment. Hol lis stared as did the rest, then shut his eyes and lived over again the walk of the night before, with her frail arm clinging close to his strong one and that sweet, distracting voice chatting

in his ear. He started up as from a reverie as the purser passed him. Hollis offered bim a cigar.

"I say, purser, who's the woman over there that nobody speaks to and every woman on the ship envies for her clothes?"

"Oh, that is the Countess of Brienne. Beautiful creature, isn't she? Gad, but she'd make a good show piece for some of those newly rich Americans!" he murmured as he passed on with the

eigar in his mouth. Hollis turned in disgust at the last remark, to be confronted by the "beautiful creature." His attempt at an explanation was cut short by her rip-

am going out for a few turns on deck Shall it be single or double breasted?" she asked naively. "Don't you want to change your

wraps?" suggested Hollis as he glanced at the beautiful drapery that was

"Oh, no, it doesn't matter," carelessly remarked the countess.

They circled the deck only once, because the crowd was inconveniently large, and soon they were seated side by side in their chairs. The air was chilly, and Hollis offered to go for extra wraps, but just then the maid came up and asked if she would be needed again that night. The countess asked for a coat. The pale faced servant soon returned and heedlessly threw the sable lined wrap over the feet of ber mistress. Hollis was dumfounded with this display of extravagance, yet stared in blind adoration at his com-"I suppose all men are fools," he

ventured to remrak.

"Oh, are they?" answered the count ess, with a ring of disappointment in her voice. "You see, I am very young and I don't know, but now you are a man of the world, a man of experience, and I suppose you know. I thought some day I might meet a man who was not a fool, and then I should fall in love with 'him."

"Lucky man," murmured Hollis, but his throat seemed to go dry and his pipe went out. "Do you think I am a

Hollis was just going to say some thing, but he looked at the sable coat and the beautifully gowned figure of the woman within it and he closed his

Thereafter they met at rare inter. vals-not oftener than Hollis could help, and the day the boat deked in New York he went over to say goodby "I wish I could call-just once," he pleaded as she hesitated.

"This is my eard, Mr. Hollis, and it you will come you may," she added as she handed him a neat little envelope with a card inclosed.

"Hollis slipped in into his pocket and once more said goodby to his lady with the silvery voice. How queet that sounded, If you will come-you may." What had she meant?

The next night Hollis hailed a hansom at the corner of his hotel and gave the driver the address. When they drew up in front of a little apartment house he wondered, but went in. Everything connected with the girl seem ed a mystery, so he did not hesitate The card had read, "Ask for Miss Tousley." He did so, and the maid said she would be in directly. He glanced about the room. Nothing elegant, yet of exquisite refinement. He looked at the pictures. There she was as a child, here as a young girl, and there again she was standing in flesh and blood in the door with two hands outstretched.

Somehow she seemed more real/more alive than ever before as she held out her hands, and he took them. She was dressed in some simple gown, and they sat on the couch together while he told her of his hopeless love, his longing for her and of his salary of a few thousand a year.

"My darling, I want you, and by heavens. I'll have you, even if you are a countess! Won't vou let me try to win you? Oh, if you only knew-if you only knew!"

"I know too well," the sweet voice said. "But I'm not a countess at all. I'm a poor girl, and my name is Tousley, just Sarah Tousley. There's nothing royal about that, is there? I am not a countess, and all those fine clothes were not mine. You see, we lost all our money, and I had to do something. Well, I could speak French and knew good clothes, so a big firm sent me over to buy model gowns. I wore them to avoid duty. Of course 1 soiled them some, but the model was just as good to copy, and -dh, please. please don't hold me so tight, dear,"

she almost sung into his ear. But he did not seem to hear her. He was saying to himself over and over

"Not the Countess of Brienne, but Mrs. Eaton Hollis."

The Poor Sick Boy. Mark Twain, on a visit to his birthplace - Hannibal, Mo. - told to the school children a true story about a schoolboy.

There were two Irishmen who recently came over to seek employment in America. Pat secured a position here, but because of some misunderstanding between his employer and himself he was to be discharged on the following Monday if he could not answer three questions.

Pat came home with a heavy heart that night and told his twin brother Mike the questions, which were: How two hours business men and boys killmuch does the moon weigh? How many stars are there? What am I thinking about? As the brothers looker very much alike, Mike said that he would go in Pat's place and answer the three questions, for he considered himself brighter than Pat.

As soon as Mike entered the office Monday morning his brother's employer said, "Pat, are you ready for the questions?" "Yes, sir," said Mike.

"Very well. How much does the moon weigh?" "Hundred pounds." "How d'ye know?" There's four quarters."

There is yet much to be added to the present good. Acceptable and occasion for local pride as our town stands to-day, it is far below ideal conditions in many respects. Probably they will always be in many other respects also, until selfishness is eliminated from our poor human nature. To accomplish this ideal demands the best in us all."

Then, looking back to a past that is full of encouragement in its honorable record, have we not reason to look hopefully to the record to be written on the leaf so freshly turned, if in the turning of that leaf there comes, as we hope it will to every one, suggestion to avoid the mistakes in the old record, clear because so plainly written, and make this new 1908 cleaner, better, more helpful than any in the past?

So many fine stories are being pubished in these days of keen editorial competition and high prices, that one must TEMPLE be of exceptional merit to stand out above its fellows and attract the undivided attention of the reading public. Kate and Harry Jackson have very funny comedy sketch, and others on this bill are the Three McCarte Sisters, clever musicians; the Kemps, a colored team; the Five Madcaps a gay company of young girls; Hill and Whittaker and the Kinetograph.

Klaw & Erlanger's great production of "The Round Up" which has held the stage at the Broadway Theatre in New York for many months, will open for a run at the Colonial Theatre in Boston next Monday evening, Jan. th. This production is of such magnitude that it cannot be presented on any other stage in New England. "The Round Up" is a powerful play, appealing with singular force to the romantic spirit inherent in everyone. The story is true to the heart and to nature, its characters are well drawn and cleverly contrasted and the entire performance teems with dash and spirit from start to finish. It is so real in its characters, its Indians, cowboys, scouts and cavalrymen, its bucking horses and its thrilling battle spectacle, that one is translated to the locale of the scenes, and, for the time, becomes actually a participant in stirring events in the great southwest. The sense of witnessing stage mimicry is entirely lost in the auditor of "The Round Up." This is the secret of the really marvelous success of this

The headliners of the anniversary bill at Keith's will be Clayton White and Marie Stuart, Walter C. Kelly, Bessie Wynn, the Romany Opera Company, the Heras Family, Bert Levy, Lansky's String Quintette, Caron and Herbert, and Cooper and Robinson—every act thoroughly representative of the highest type of the branch of vaudeville to which they belong. Clayton White and Marie Stuart are to present for the first time in Soston their new Hobart sketch, "Cherie." "The Virginia Judge," as Walter C. Kelly is known, stands alone as a teller of dialect stories. There is no prettier, daintier, more winsome soubrette in vaudeville than Bessie Wynn, who will have an almost entirely new repertoire of songs.

The Romany Opera Company is the great singing organization vaudeville has ever known.

The Heras Family rank with the best of the great acrobatic troupes that Europe has sent to us. Particularly novel is the act of Bert Levy, the well known caricaturist. Lasky's String Quintette is a thoroughly high class instrumental organization, while Caron and Herbert hold a foremost position as acrobatic comedians, and Cooper and Robinson are the cleverest team of "real coon" singers and dancers now on the stage. The Clarence Sisters, two chic soubrettes from Australia; Dudley and Cheslyn, vocalists; the Rice Brothers, horizontal bar humorists; Ed Estus, a great equilibrist, and new pictures by the Kineto-graph will round out a bill worthy the occasion. Of keen interest to theatre patrons is the

change in policy at the Tremont which takes effect Monday, Jan. 6, when that playbouse abandons vaudeville and returns to former conditions, offering regular attractions. And what heightens in this change is the fact that it brings back Henry W. Savage's musical plays, which in seasons past were features at the Tremont, and indeed of the Boston the atrical year. Under the change of policy at the Tremont the first offering will be one of Mr. Savage's companies. "Tom Jones" will Mr. Savage's companies. 'Tom Jones' will be the attraction. 'Tom Jones' and "The Merry Widow" are the two new productions Mr. Savage has made this season. Both "Ton Jones" and "The Merry Widow" have been the musical hits of the season in New York, and patrons of the Tremont are fortunate in having the chance to enjoy the one at this time. "Tom Jones" is a comic opera founded time. "Tom Jones" is a comic opera founded on Fielding's famous novel. In London and in New York it scored a tremendous success It is old English, and its music, by Edward German, is of distinct charm. Furthermore the comedy is excellent. The whole fabric is a clever combination of comedy and melody of a clever combination of comedy and melody of exceptional attractiveness, while the stage pictures, representing English acenes of one hundred and fifty years ago, are of striking effectiveness. The cast includes Louise Gunning, William Norris, Gertrude Quinlan, Albert Parr, John Bunny, Henry Norman, May Mooney, Vaughan Trevor, Florence Burdette, and many others with a big charge and enecial or many others, with a big chorus and special orchestra. The engagement is limited to two weeks beginning Jan. 6, with matinees Wed-nesdays and Saturdays.

A Happy New Year to all our readers. From time immemorial it has been said that Leap Year is a red letter one in the cycle of time for spinsters old or young, if they desire. When February hath one day more they have the privilege of popping the question, but Massachusetts never allows them to vote even that year and thus assume the masculine function.

Tuesday afternoon, about two o'clock. the fire companies from here and the centre responded to an alarm for a fire in the lower part of the village. It was the house of Mr. William Sim, very near to Dr. Alderman. We hear that the firemen worked well, but we do not know the extent of the destruction to the house at time of writing or the cause. It is very hard for a large family to be turned out of their home and particularly in winter weather.

Mrs. Susan C. Moody, widow of William Moody and mother of Mrs. Leonard Christiansen, was brought here for burial last week, as she lived here nearly a year with her daughter previous to their removal a few weeks since to Cambridge. She felt most deeply the death of her husband who died in our village in the early spring. She was a most excellent woman and those who knew her loved view of art collection. Skill and taste are shown and respected her.

In a Lowell paper a Wilmington correspondent speaks of the Woman's Club meeting at Mrs. George Buck's hospitable home, when the members listened to a lecture given by Mr. George Willis House, Sign and Decorative Painter, Cooke, of Wakefield, a former pastor of Follen church. His subject was the famous Alcott family. It says, "Mr. Cooke is a courtly gentleman of the old school, Arungton 89-4: Somerville 412-6. agreeable in manner and conversation and well worth hearing."

Rev. Henry C. Parker, of Woburn, addressed the Guild, Sunday evening. His DISINFECTANT subject was, "How are we to tell a Christian." In remote times some gave five ways, -casting out devils, speaking with many tongues, healing the sick, taking any poisonous reptiles, taking poisonous drink,-but no one now would subscribe to these or some of the five points of Calvinism. The federation of churches tested a Christion by belief in the deity of Christ. How are we as liberals to tell a Christian? He said he would name the following,-an aspiring soul, an open mind, a loving heart, a helping hand, a

The annual party given during the holidays for the children and young friends of Lexington by the the Old Belfry Club. Cyclopædia of architecture, carpentry took place on Saturday afternoon of last week, in the assembly hall of the club house. There was a large party of children present, of ages ranging from two and a half years to sixteen, the children in their middle teens of course predominating. It was a fancy dress party and the first of its kind that we remember in which children have had a part. A VALID OBJECTION.

Young Sheridan's Ready Wit Saved Him a Birching. Richard Brinsley Sheridan early

evinced a genius for getting something for nothing and, seeing the door of the refectory had inadvertently been left unlocked, peeped in and saw a huge basket of grapes freshly gathered from . the orchard.

Stealthily closing the door and approaching the grapes, he thus addressed them: 'I publish the banns of marringe between Richard Brinsley Sheridan and these grapes. Is there any one to forbid the banns?" And having no reply to his query, he proceeded to fill his breadbasket from the other basket with great gusto. But retribution was to follow, for on the class being reassembled the master called upon Richard Brinsley Sheridan to stand forth and joined with his name the ominous name of Walker, who was the dunce of the school and selected from his weight and size to mount the culprit upon his shoulders in order that the master might get a firm surface upon which to use the birch with ef? fect.

Sheridan being duly mounted and appropriately denuded of superfluous raiment, the master thus addressed him: "I publish the banns of marriage between Richard Brinsley Sheridan and this birch. Is there any just cause or impediment why the e two parties should not be joined in holy matrimony?"

"Hold!" yelled Sheridan. "Well?" said the master

To which Sheridan said, "Why, sir. the parties are not agreed?"

This being not only witty, but apt, as being a valid objection in point of law. Sheridan was requested to retire and restore himself to his former ! habiliments amid the uncontrollable laughter of all concerned, including the head master.-Exchange.

THE LAND OF OPHIR.

Where Was It-In Mashonaland, South Arabia or India?

One of the most interesting and important questions concerning Biblical sites perpetually invites research and persistently evades solution. "Where is the land of Ophir?" Dr. Karl Peters' at a public meeting in Berlin declared emphatically that this famous Biblical region is located between the Zambezi and Limpopo rivers. He told his German audience how he has discovered many shafts of ancient gold mines, 500 temples, fortifications and other ruins of Phoenician origin. Dr. Peters affirms that coins unearthed in Mashonaland belong undoubtedly to the time of King Solomon. His opinion is that no other part of Africa could have experted the ivory, silver and precious stones which are recorded in the Bible as coming from Ophir.

Against this theory, founded as it undoubtedly is on very plausible evidence. Bible students are still likely to maintain, on the testimony of Gene sis x, 29, that Ophir was a section of South Arabia. Here down to the time of Ezekiel the Phoenicians still landed to procure gold and gems with which those faujous sailors and mer- a, m, and every half hour until 10.45 p, m. chants of the ancient world traded in many countries distant from their Syrian shores.

Many erudite writers have attempted to identify Sofala, on the east coast of Africa, with Ophir, while yet others have located it in India. One of the most learned essays written on the subject is from the pen of Professor and every half-hour until 1.30 p.m. For Trapelo Road 6.45 a.m. and every half-hour until 10.15 p.m., then 11.00 Hommel, who argued that the ancient land of gold was Arabia Felix.—Hom-, and every half-hour until 10.30 p. m., then 11.15 fletic Review

A Man to Be Envied.

"Do you know," remarked a visitor to a Broadway hostelry, "I'm always inclined to envy the clerk in a hotel like this. He is always well groomed and smiling, has a wider acquaintance among the wealthy or well to do than I can ever hope to have and is always so aggressively at peace with the world and himself; also he wears, more of ten than not, a diamond scarfpin or 57 Lake St., ring which is certainly beyond me. It's a pretty comfortable berth."

Several hours later the hotel clerk reached for his coat and hat. As he left the office he turned to a comrade. "Say, Ned, can you let me have \$10

till the first? Rent due at home tomorrow, and I in shy. Doctor's bills hit me pretty hard this month, and I don't want to lie awake tonight if I can help it."-New York Globe.

Her Poor Memory.

A woman who belonged to an ancient but penniless family married a rich plebeian, but she never forgot the misalliance nor allowed any one else to do so. One day, attended by a servant. she went into a store and gave an order.

"And where shall I send it, madam?" said the shopkeeper.

"Jean," said the woman, turning to her servant. "tell the man your master's name. I never can remember it."

NEW SHORT STORIES

When Landis Was Bowled Out. Congressman Charles B. Landls of Indiana tells a story of how he was bowled out at a political meeting he addressed during the campaign of 1904. He was paying his respects to the Democrats in no uncertain terms, ridiculing their principles and their isms and placing their candidates in a ludicreus light.

"'It is your own record,' said the husband trumphantly. 'I set the ma chine on you last night in your sleep. Now mayle you'll believe that you snore."

The Political Orator.

There is little telling what some men will say when making nominating speeches in political conventions, says the St. Lowis Post-Dispatch Bill Ir win, chief clerk in the secretary of state's office, who knows more anecdotes probably than any other man in the state, tells one concerning a nominating speech by George Kleinpeter, an attorney at Carrollton.

"Gentlemen." he began, "Alexander the Great conquered the world and wept because there were no more worlds to conquer. Caesar had his Brutus and Charles I. his Cromwell. Napoleon werran Europe, remapped Asia, divorted his beloved wife, Josephine, and died an exile upon the lonely shores of St. Helena. Therefore, gentlemen, I nominate Sam Clark for prosecuting attorney."

NATURE'S MYSTERIES.

And the Little That Man Really Knows About Them.

I seized the opportunity some little while ago on finding myself sitting next to a great physicist of asking him a series of fumbling questions on the subject, of modern theories of matter. For an hour I stumbled like a child. supported by a strong hand, in a dim and unfamiliar world, among the mysterious essences of things. I should like to try to reproduce it here, but I have no doubt I should reproduce it all wrong. Still, it was deeply inspiring to look out into chaos, to hear the rush and motion of atoms moving in vast vortices, to learn that inside the hardest and most impenetrable of substances there was probably a feverish intensity of inner motion. I do not know that I acquired any precise knowledge, but I drank deep drafts of wonder and awe. The great man, with his amused and

weary smile, was infinitely gentle and left me. I will say, far more conscious of the beauty and the holiness of knowledge. I said something to him about the sense of power that such knowledge must give. "Ah," he said, "much of what I have told you is not proved; it is only suspected. We are very much in the dark about these things yet. Probably if a physicist of a hundred years hence could overhear me he would be amazed to think that a sensible man could make such puerile statements. Power-no, it is not that! It rather makes one realize one's feebleness in being so uncertainabout things that are absolutely certain and precise in themselves, if we could but see the truth. It is much more like the apostle who said: 'Dord, I believe. Help than my umbelief! The thing one wonders at is the courage of the men who dare to think they know."-Putnam's."

POWER OF WEALTH.

Money, Says a Physician, Is Able to Purchase Even Life. The aged millionaire sighed.

"I'd give all my money," he said, "if I could buy twenty-five more years of life. "But your money has already

bought you that," said the physician "What rot are you talking now?"

the millionaire asked peevishly. "No rot at all, for it is a fact, a dreadful fact." said the physician "that the rich live, on the average, twenty-five years longer than the poor Born rich, you are assured of a quarter century more life than would be your allotment were you born poor

"Oh, wealth protects one from so many fills. Rich babies nearly always

live, but poor ones die of a hundred as easy to read in America as the complaints induced by poverty. Poor babies die off shockingly. And so with boys and girls, with men and women-"Heinz Wienerschnitzel, he explain. If they are rich. They live healthily and therefore long, while if they are poor they live unhealthily, and disease, accident, contagion, privationall sorts of preventable things carry

them off

"Yes, money buys life, and reliable statistics show that if two children are born today, one rich and the other poor, the rich one will outlive the oth-"Some time passed. The wife, is- er by the tidy margin of twenty-five

The Origin of "Parson."

"Parson" is from the Latin "persona," a person, and the parson is the "'Well, what is it?' her husband's persona ecclesiac, or representative, of the church. The forms parson and person bear the same relation to each other as clark and clerk. From being pronounced parson the word has come to be so written. Blackstone in his "Commentaries" says:

"He is called parson" (persona) because by his person the church, which next issue is an invisible body, is represented. and he is himself a body corporate in order to protect and defend the rights of the church which be represents?

"To parse a sentence" is to resolve it into its grammatical parts, and the verb is declared to have arisen from the Interrogation "Pars?" - that is, "Quae pars orationis?" (What part of speech?) used by schoolmasters.

Flat Toque In Favor Again.

Though the toque never really went out of fashion, for there are many women who, like Queen Alexandra, found it becoming and refused to give it up. It has not been generally worn in recent days. The round toque, which fits close to the head and is worn per feetly flat with no upstanding trim ming, is finding such wide favor that It threatens the sovereignty of the buge picture shape. These toques frequently are made of velvet to match the gown with which they are worn and are bordered with fur or with the feather trimming that has become popular again.

The Empire Slant.

The empire influence is still perceptible in the shortening of the waist line at the back of many of the newest coat models, but on the whole the square stole lines that suggest the garments of ecclesiastical dignitaries are in the lead, and their flatness of effect is relieved by trimmings of braids and cords disposed in an endless variety of ways. Usually a wide braid emphasizes the lines of the garments, and the narrower braids or cordings make

The Latest In Insurance. It is now possible in England for erfists and authors to hasure their work against failure. The manager of a Loudon insurance company reskirt is a five gored model, with a pret- cently said that most of the companies were prepared to accept risks which a short time ago would have been considered ridiculous. Under policies now obtainable insurance can be obtained by an author that his latest book will sell to a given number of copies, a playwright that his drama will not be taken off the stage through failure before a stipulated number of performances, a painter that his canvas will be accepted by the Paris salon or the Royal academy or will be sold within a time agreed upon, a composer that his song will be a success and a golfer that he will be relieved of financial responsibility if he hits or injures his caddie. "Of course," said the insurance man, "we will not issue a policy if the risk is obviously too great. An author, artist or playwright would have to be of established reputation. Sir A. Conan Doyle and Mr. Kipling could obtain a policy insuring that any

It is interesting to learn on the evidence of a keen eyed reporter that the kaiser wore while in England the famous Hohenzollern talisman, which for centuries has been credited with a supernatural power to protect its wearer from harm of any kind. This imperial talisman, a massive gold ring with a square, dark colored stone, which the emperor is said to wear on the middle finger of his left hand, has a highly romantic history, dating from the far off days when his ancestors, the Margrafs of Nuremberg, followed their leaders to the capture of the boly sepulcher from the Moslems. The ring, which was captured in a hard fought battle under the walls of Jerusalem, came into the possession of Margraf Ulrich, from whom it has descended to his successors, generation after generation, as a highly prized heirloom. The sentence from the Koran which adorned the ring when worn by Saladin and his successors has been removed and a Latin cross engraved in its place. Westminster Gazette.

Domestic Arsenic.

Thousands of tons of arsenic are wasted annually in the fumes that pour from the stacks of the great smelters of the United States, yet notwithstanding this waste or perhaps because of it more than 8,000,000 pounds of arsenic and arsenic compounds, costing about \$375,000, were imported into this country in 1906. The domestic production for the same period was only a little more than one-sixth of the quantity imported and was valued at but \$63.460.

Arsenic ores are widely distributed. particularly in the granitic and highly metamorphosed rocks, and ores of tin. copper and antimony are frequently accompanied by those of arsenic. Native arsenic, a tin white brittle substance occupying a place midway between the metals and the nonmetals. is found sparingly in veins at a number of places, but it is not important as an ore.-Los Angeles Herald.

He Was Smoking.

Senator Money's physician advised him recently to give up smoking, putting him in the same class with Senator Bacon, also smokeless after twenty years of it. Senator Money's physician stopped at the capitol the other morning and went into the Mississippian's committee room to pass the time of day. As he entered he noticed the senator sitting back in his chair with his foot on the desk and a huge cigar in his mouth.

"Here, senator," he said, "I thought I told you to quit that."

"Quit what?" asked Mr. Money in

mild surprise.

"Why, quit smoking tobacco." "Tobacco, man! Why, my dear doctor, I am not using tobacco. I am merely smoking a cigar Senator Beveridge gave me."-New York World.

An Artificial Aurora.

Not long ago in a lecture before the Royal society of London Professor Ramsey showed an experimental proof of the electrical nature of the northern lights. Between poles of a powerful electromagnet he suspended a Petersburg (Tenn.) man, "they will an exhausted glass globe containing at the top a metallic ring. An alternating current discharged through the ring in the globe produced an annular glow, and when a current was sent through the coils of the electromagnet the glow was deflected downward in streamers resembling those of the aurora borealis.

The spectrum of the natural aurora shows the presence of krypton, and in Professor Ramsey's experiment krypton was produced in the discharge through the rarefied air within the globe.

THE SHOEMAKER'S ART.

It Has Been Known Since the Earliest Days of Chvilization.

A few winters and I passed a day among the wonderfully decorated tombs in the cemerry of what was once Memphis, upof the western bank of the Nile, writer Julius Chambers in the Brooklyn Bagle. One of the show places is the remarkable underground palace that the illustrious Queen Ti of the ofth dynasty (i. e.. about 4.500 years ago) constructed for her final resting place. It consists of a great court 40 to 60 feet, as I remember, and several other apartments, besides the mummy chamber, which is reached by a stairway leading down from the largest froom. Upon the walls of this tomb are the best preserved pictures to be found in al. Egypt, and among them are the figures of two artistns working upon coverings for the feet.

Therefore, makers of shoes, I salute you! More than 4,000 years before the art of printing had practical existence, although you will admit that the decorator of Queen Ti's tomb was almost a publisher, your art was cognized, respected and immortal-

AN OLD TIME ASCENT.

London's First Ballon and the Great Excitement at Raised.

Tremendous excitement was caused when London's first balloon went up. The balloon, manned by a young Italian named Vincent Lunardi, ascended from Moorfields, then an open space of ground, on Sept. 15, 1784, in the presence of more than \$00,000 spectators. All business was suspended, the king himself setting the example by adjourning a cabinet council that happened to be sitting. & Vast crowds followed the balloon's course, some on horseback, in carts, in chaises, but and so increases it. mostly on foot. the only fatality recorded was the her head. On the other hand, Lunardi undoubtedly saved one man's life, a jury bringing in a verdict of not guilty on a notorious highwayman in order that they, the prisoner and the judge who was trying the case might rush out of court to see the balloon.

The aeronaut descended eventually near Ware, in Hertfordshire, where his sudden drop from the clouds was the cause of more astonishment and excitement. Many of the spectators Star. swooned with fear, while others urged the putting of Lunarii to death there and then on the ground that he must needs be a sorcerer and in league with the evil one

Statistics furnished by manufactur-ers of shirts and collars indicate that the average New York man has a smaller neck than his out of town brother. Comparison of orders shows that out of a given volume of business booked Boston and Chicago led in the matter of big sizes. Inquiry at several haberdashery shops in Manhattan resulted in the information that any number larger than sixteen and a half would have to be specially called for from the factory or had through the selling agent. In other cities it is an everyday experience to sell as high as size eighteen over the retail counter. Of course the dement of snug fit is a factor, but as a regular proposition eastern and western men are more 'bull necked" than is the case with their New York brethren .- New York Press.

INSULTS TO ROYALTY.

Some of the Things That Constitute Leze Majesty In England.

Many people think that leze majesty -giving insult to royalty-is not a crime in Great Britain. The English statute books, however, contain many penalties for such offenses.

Placing a postage stamp on a letter apside down is a punishable offense, as is also the defacement of a coin bearing the royal image. This is insulting the king's effigy.

Private individuals may not raise the toyal standard over their dwellings. This is the emblem of the regal authority to be displayed only where the king is present.

While an agitator may talk against royalty in the abstract as much as he chooses, contemptuous or insulting personal references to the reigning sovereign opens the offender to a heavy fine and imprisonment.

The slightest slap upon the face of the king or queen-or any other part of the anatomy, for that matter-is punishable with the death penalty. In the reign of Queen Victoria a Lieutenant Page struck her across the face with his cane. He was sentenced to death, but the queen commuted his sentence.

It is likewise a crime to bring the uniform of the sovereign into contempt. To garb a low comedian or a villain of the stage in a discarded uniform of the army or the mayy is suffigient to bring heavy censure from the government For this reason theatrical managers usually see to it that the uniforms worn are not exactly dopies of the real things.

One day there was to be company at the table, and the mother said:

"Now, Mabel, Mrs. Brown is to dine with us tonight, and I want you to act at the table just as nicely as she does. Please don't 'mush' your soup."

Mabel promised faithfully to follow the example set by Mrs. Brown, and the dinner opened with every promise of a fine time. However, Mabel was using a pair of very sharp eyes on Mrs. Brown and in an instant blurted forth at the top of her voice:

"Oh, mamma, Mrs. Brown is 'mush ing! May I?"

Betty's Decision.

By LULU JOHNSON.

Copyright, 1907, by C. H. Sutcliffe.

Mournfully the somber melody of the dead march from "Saul" came through the double sashed windows of the Eagle House The music gained in mournfulness what it lacked in impressiveness, for Dan Hicks' struggles with the unfamiliar clarinet added a wailing note not intended by the composer. Not one of the members of the Grantville Cornet band was a skilled musician

Vance Bevan moved over to the window to watch the passing of the cortege. First came the band, shivering in their gandy uniforms, which they would not hide beneath their over-Hose company and the Grantville enough for two. Shall I go or stay? Hook and Ladder. The long, light truck of the latter was stripped of its tadders, and in their place was a platform, on which rested a flag draped casket. Flagler rattled on with bits of information as the various carriages passed. The first heavy fall of show was upon the ground, and a few sleighs were in the long procession. Bevan heard a little of the running comment. The mention of Betty Harvey had roused a chain of thought. He had run up from the city to argue with her and had found the whole town upset by the arrival of Fred Greyson's body Betty was busy comforting her friend, Bessie Brewster, and would not even see him.

There was small hope that he would be able to get speech with her, but he decided to wait until after the funeral. He wanted to make one last appeal.

The two had met at the shore during the summer. Betty had given her love to the clean young engineer, but when he had asked that they might be married soon she had shaken her head Stumblingly she had explained her reasons for refusal. She was an heiress, and in the little town in which she lived she feared that the people might despise her suitor as a fortune

Ever since she had come into the money at the death of her father her friends had warned her against the wiles of the fortune hunters. She did not for an instant believe that Bevan proud of him to be willing that he should so be classified by others.

The dead march still sounded clearly on the crisp, frosty air, and Bevan fell in with the crowd that escorted the procession on foot. The road wound up the side of the hill to God's acre, where the yellowed headstones gleamed darkly against the freshly fallen snow. The fire companies made a hollow

Nurses in training have many hardships to bear, but perhaps none is worse than having to appear cheerful under all conditions. A sense of hismor is perhaps as great an asset as a nurse can have, for it will belp ber over many a difficulty.

The daughter of a wealthy man became imbued with the desire to know how to earn her own living, and to that end she entered one of the large New York hospitals as a nurse. The work was to her liking, and as she looked on the bright side of everything she was generally in a happy frame of mind. Her particular "pet" was an old and illiterate sea captain who was cared for her money, but she was too in the surgical ward with a broken arm which would not knit. This was somewhat of a surprise to as we thought, in view of the fact that where had been very little going on in Arlington of a social nature during the season thus far, that the several dancing sets would participate and make it a jelly, big party including young people, in evening dress and handsomely attired, was an exceptionally attractive one. No one could have had a
better time than they. There were partners for all the girls and in the opening
waltz everybody was up and dancing,

Messrs. Warren A. Peirce, Jr., Robert C. Clifford, Jr., Grayson B. Wood, Gardner P. Bullard, Wm. G. Bott, were the five young men managing the party and also ushered. The matrons were Mrs. Henry W. Bullard, Mrs. Frank Bott, Mrs. Robert C: Clifford, and they received in handsome reception costumes. Custer's orchestra played during the reception and for the dancing. The hall was in holiday attire. A quantity of evergreen festooning was used suspended from the ceiling and also was hung about the balcony which was reserved as a retiring or sitting out room, comfortably furnished with rugs and easy chairs. Gayly colored Jap lanterns were hung over the electric lights, producing a subdued and lovely color effect, although they dimmed the light in the hall very

considerably.

There was no end of pretty girls and good dancers and several toilettes worn were elaborately designed and beautiful. Mrs. Bullard was in black lace over tripple skirts of white chiffon and silk.
